

Blog Platform with Comments - Project Documentation

Project Goal

Develop a blogging platform where users can create, edit, and delete blog posts, while allowing authenticated users to comment on posts. The project focuses on full-stack development, user authentication, content management, and RESTful APIs.

Key Features

- User Registration and Login
- Secure Authentication using JWT
- Create, Read, Update, Delete (CRUD) Blog Posts
- Comment Section for User Interaction
- RESTful API Backend
- Database Integration with MongoDB
- Responsive User Interface

Suggested Technology Stack

Frontend: React.js, Tailwind CSS / Bootstrap

Backend: Node.js, Express.js

Database: MongoDB Atlas

Authentication: JWT, bcrypt

API Testing: Postman

Deployment: Vercel (Frontend), Render (Backend)

Database Collections

Users: name, email, password

Posts: title, content, author, createdAt

Comments: postId, userId, commentText, createdAt

REST API Endpoints

POST /api/auth/register

POST /api/auth/login

GET /api/posts

POST /api/posts

PUT /api/posts/:id

DELETE /api/posts/:id

POST /api/comments/:postId

GET /api/comments/:postId

Project Structure

```
blog-platform/  
  ■■■ frontend/  
  ■■■ backend/  
    ■■■■ models/  
    ■■■■ routes/  
    ■■■■ controllers/  
    ■■■■ middleware/  
    ■■■■ config/  
  ■■■ database/
```

Learning Outcomes

- Understand full-stack application architecture
- Implement secure authentication and authorization
- Build RESTful APIs and integrate databases
- Manage user-generated content and comments
- Deploy production-ready web applications
